CORE Process Announces new treasury service for Akelius

CORE Process will deliver full SWIFT and EBICS integration to Akelius with tm5 by BELLIN

Akelius, a global leader in residential real estate, has signed on as CORE's client for a complete EBICS payment and SWIFT account management solution for the global market. The solution involves big players such as Commerzbank, BNP, BAML, TDBank in Canada and Danske Bank.

"We strive to add quality services as we are growing on the international real estate market. This time we focus on payments and SWIFT services where we need to improve security and efficiency together with our digitization process, said Treasury Manager Carl Brättemark at Akelius. He added, "The umbrella of tm5 complete treasury system solutions from CORE and BELLIN is unique to the market and represents a solution that is continuously improving. We are excited to implement it in our business."

This partnership further exemplifies CORE's dedication to establishing innovative solutions within the Nordic market and foreshadows the gradual shift from traditional treasury methods. With Akelius seeking precision and a means to streamline their treasury activities across the globe, the BELLIN tm5 is a game-changing solution that offers multi-faceted functionality.

"We are confident our full integration package will optimize Akelius processes while maximizing security. We are thrilled to work with their team and help to solve the payment issues they are facing on the European market," explained Lars Beckman, Managing Director of CORE Process.

About Core Process

CORE Process is a consulting firm specializing in cash and treasury management services. Core's main business function is strategic advice and ongoing treasury services for corporate operations (Treasury as a Service). Core Process is an authorized partner of BELLIN and provides consulting and support for tm5 treasury management software.
